

YOUR PRODUCT. YOUR BRAND.

Finished skincare. Made for your brand.

Develop a formula or bring your own. We coordinate filling, labelling and finished packaging for skincare brands, sourcing teams and product developers.

Product packaging illustration.

Formula development / Filling / Labels & finished packs

BFS ampoules, traditional ampoules, bottles, jars and skincare blister concepts – with a clear path from your brief to a finished pack.

Choose the format. Build your range.

Explore a product direction, discuss your own formula or request sample options. We confirm the specification, preparation time and fees before dispatch.

01 / SINGLE-DOSE

BFS skincare ampoules

Serums and essences in individually sealed formats for routines, travel and discovery kits.

MOQ: 10,000 ampoules

02 / EVERYDAY SKINCARE

Bottles, jars & sets

Serums, creams, toners and haircare, with coordinated labels, cartons and sample sets.

Quantity confirmed by product and packaging

03 / ROUTINE CONCEPTS

Skincare blisters

Individually sealed pods for multi-step routines and portable skincare kits.

MOQ and sample readiness require confirmation

Traditional ampoules: MOQ 5,000 units. Material and format are confirmed for your project.

Product images are brand packaging illustrations. Formula, fill volume and final pack specifications require confirmation.

One team from brief to production.

Steridose Labs is operated commercially by Guangzhou Maolin Technology Co., Ltd. Our international commercial and technical team coordinates projects across a controlled two-site manufacturing network.

Equipment operation at a manufacturing facility in the network.

Company-provided network figures. Site-specific identity, quality documents and applicable scope are reviewed during supplier qualification; internal records are not public downloads.

Bring your formula. Or start with an idea.

Transfer an existing formula under NDA, adapt a product direction or explore new development. We review formula, packaging and process compatibility together.

01 Tell us what you need

Share the product, target market, quantity and launch timing.

02 Review your options

Receive a proposed development path, packaging choices and the information needed for a quotation.

03 Agree samples & specifications

Confirm the sample, preparation time, fees, testing needs and the finished-pack requirements.

04 Prepare for production

Approve the specification, artwork, document scope, quantity and schedule before production.

Tell us what you want to create.

Your product idea + target market + estimated quantity.
